POCKET PRICE LIST

FALL

OF

1900

EVERY-THING  
FOR THE FRUIT  
GROWER.

E.W. REID'S

Nurseries.

UPLAND,  
OHIO.

E. W. REID.

ALFRED JERVIS.

## INTRODUCTION.

In accordance with our annual custom, we have pleasure in handing you our Fall Pocket Price List for 1900, which contains a list of stock growing for the coming season's trade. Our large descriptive catalogue can be had on application.

We desire especially to thank our many patrons for their orders in the past, and feel sure with our increased facilities and many improvements we make every year, we are in better position than ever to meet our large and growing trade.

Our stock for Fall is all that could be desired; no better can be had, as our growing season has been very favorable.

Experience has proved Fall as the best time to plant out trees, excepting one or two varieties, and these are better got in Fall, trenched out, ready for use in Spring as wanted. Fall set trees seldom fail, and if Fall planting was more generally adopted, there would be little or no loss in setting stock. Winter rains compact the earth about the trees and put them in the best position to start growth in Spring. Also it avoids the rush of Spring work, and can be done better and with more ease.

Owing to the scarcity of Nursery stock, prices have advanced on some varieties, and it would be to the interests of our customers to order early at our Fall prices, as present indications are, the rates will be considerably higher in Spring, if the present demand continues, and some varieties cannot be had at any price.

ALL OUR STOCK HAS BEEN INSPECTED BY THE STATE AUTHORITIES, AND IS ENTIRELY FREE FROM ALL DISEASES OR INSECT PESTS, AND NO SHIPMENT WILL BE ALLOWED TO LEAVE THE NURSERIES WITHOUT A CERTIFICATE TO THIS EFFECT.

Hoping to have the pleasure of your orders, and assuring you of our careful attention,

Yours respectfully,

REID'S NURSERIES.

## Terms and Advice,

**CASH WITH ORDER.** Address all mail to Reid's Nurseries, Upland, Ohio. Remit by Postoffice or Express Money Order, or Draft on New York or Chicago. Money orders must be made payable at Upland, Ohio. Telegraph and freight address will be Bridgeport, same as before.

**C. O. D.** We will send stock in this way, provided one-fourth the amount is sent with the order, and the purchaser pays return charges on the money.

**ORDER EARLY.** You have everything to gain by sending in your order early. Don't delay, as some stock is apt to be exhausted before the season ends.

**ESTIMATES** will be cheerfully furnished on large orders. In many cases we can quote less than catalogue rates where our stock is in surplus.

**OUR PRICES** include packing. Orders are delivered free to the forwarders here, when our responsibility ceases. In case of delay, we will do our utmost to expedite delivery.

**SHIPPING FACILITIES.** No nursery in the country has better means of transportation than we, as we can reach every point in the land over the following roads and connections: B. & O.; P., C., C. & St. L.; C. & P.; W. & L. E.; C., L. & W. (which is run by the Big Four in connection with the L. S. & M. S.), and the Ohio River Railroad. We can also ship by the Ohio River steamers, which are very handy, and their freight rates are low.

**FORMER PRICES** are set aside, as this list abrogates all previous prices.

**GUARANTY.** All our stock is true to name and carefully labeled; yet, while we exercise the greatest care to do this, we will not be held responsible for any sum greater than the cost of stock, and when varieties become exhausted we reserve the right to substitute others of the same class and value, except when orders are marked "No substitution."

**PACKING SEASON.** We commence packing about the 1st of October, and continue till the ground freezes—usually about the 15th of December.

## Fruit Trees.

**PREPARATIONS FOR PLANTING.** Plow and subsoil repeatedly, so as to pulverize thoroughly to a depth of 12 to 18 inches. When planting on the lawn or grass plot, remove the sod for a diameter of four to five feet, and keep this space well worked and free from weeds. Dig the hole deeper and larger than is necessary to admit all the roots in their natural position, keeping the surface and subsoil separate. Cut off broken and bruised roots, and shorten the tops to half a dozen good buds, except for fall planting, when it is better to defer top-pruning until the following spring. If not prepared to plant when your stock arrives, "heel-in," by digging a trench deep enough to admit all the roots, and setting the trees therein as close as they can stand, carefully packing the earth about the roots, taking up when required. Never leave the roots exposed, and "puddle" before planting.

**PLANTING.** Fill up the hole with surface soil, so that the tree will stand about as it did in the nursery after the earth is settled, except for Dwarf Pears, which should be planted deep enough to cover two or three inches the quince stock upon which they are budded. Work the soil thoroughly among the roots, and when well covered tramp firmly. Set the tree firm as a post, but leave the surface filling (or poorer soil) light and loose. No staking will be required except for very tall trees. Never let manure come in contact with the roots.

### Distances Apart for Planting.

	Feet.
Standard Apples .....	30
Standard Pears and strong-growing Cherries.	20
Duke and Morello Cherries.....	18
Standard Plums, Apricots, Peaches, Nectarines .....	16 to 18
Dwarf Pears .....	10 to 12
Dwarf Apples .....	10 to 12
Grapes .....	7 to 16
Currants and Gooseberries.....	3 to 4
Raspberries and Blackberries.....	3 to 4
Strawberries .....	1 to 2

BISMARCK. (Reduced.)

### Apples.

The first fruit, both in importance and general culture, is the Apple. By planting judicious selections of summer, autumn and winter sorts, a constant succession can be easily obtained of this fruit, so indispensable for family use. There is no farm crop which on the average will produce one-fourth as much income per acre as will a good Apple orchard.

### THOUSAND RATES ON APPLICATION.

#### New Varieties.

		Each.	Doz.
Bismarck.	First-class .....	\$0.50	\$5.00
"	Medium .....	.30	3.00

## Crab Apples.

Prices same as for Standard Apples.

Gen. Grant.	Orange.	Siberian.
Hewes' Va. (Cider).	Quaker Beauty.	Transcendent.
Hyslop.	Whitney.	

ADMIRAL DEWEY.

## Peaches.

The Peach tree requires a well-drained, moderately rich soil; a warm, sandy loam is probably best. To preserve the continued healthy growth of the trees and the fine quality of the fruit, the trees should have the shoots and branches shortened every year, so as to preserve a round, vigorous head with plenty of young wood; and the land should not be seeded to grass, but kept in constant cultivation in hoed crops.

## Admiral Dewey.

Admiral Dewey is another triumph in the production of very early Peaches. There is no known very early variety that can compare with it in all the qualities that go to make a desirable early market Peach. Its introduction will mark as great an advance in early varieties as did the advent of the Triumph, to which it is much superior. **Admiral Dewey** is a perfect freestone Peach, ripening with Triumph, but has better form, brighter color on the surface, is equally hardy and productive. The flesh is of uniform color and texture to the pit. The tree is a strong, symmetrical grower and as near perfection as we can obtain in any one variety. Price, 1-year, 30 cts. each, \$3 per doz.; June buds, by mail, 25 cts. each, postpaid.

## Lorentz.

A seedling discovered in Marshall county, West Virginia, and which we carefully watched several years before deciding to offer to the public. We are now more than ever convinced that this is something better than has ever been offered for a Peach so late in the season. We have never known it to fail a crop in the most adverse seasons, and believe it as near frost-proof as any variety yet introduced. It bears crops when others fail entirely. Fruit is unusually large and of a superior flavor, especially for one so late in the season. It is a freestone, yellow-fleshed, and its handsome appearance has been a surprise to all who have seen it. It bears enormously, one foot of wood cut for photographing having as many as 25 Peaches on, and frequently requires thinning from overproduction.

	Each.	Doz.	100
First-class, 4 to 6 feet.....	\$0.25	\$2.50	\$10.00
Medium-class, 3 to 4 feet.....	.20	2.00	8.00
Second-class, 2 to 3 feet, mail size, postpaid .....	.15	1.50	6.00

## Fitzgerald.

This hardy new yellow Peach is attracting great attention among discriminating growers. We give the best description yet attainable. "Originated on north shore of Lake Ontario. Original tree has borne five successive crops. The best posted grower in Michigan says it is as large or larger than Crawford's Early, with the smallest pit he ever saw, and the most brilliant colors. Grows similar to Crawford, ripens between Early and Late Crawford; flesh rich, deep golden yellow of very high character. Certainly a very fine Peach; stands the winters better than any yet offered."

	Each.	Doz.	100
First-class .....	\$0.25	\$2.50	\$ 8.00
Medium-class .....	.20	2.00	7.00
Second-class, mail size, postpaid...	.15	1.50	5.00

## Greensboro—Extra Early.

First-class .....	\$0.20	\$2.50	\$ 8.00
Medium-class .....	.15	1.50	7.00
Second-class, mail size, postpaid...	.10	1.00	5.00

## Bokhara No. 3.

First-class .....	\$0.20	\$2.00	\$ 7.00
Medium-class .....	.15	1.50	6.00
Second-class, mail size, postpaid...	.10	1.00	5.00

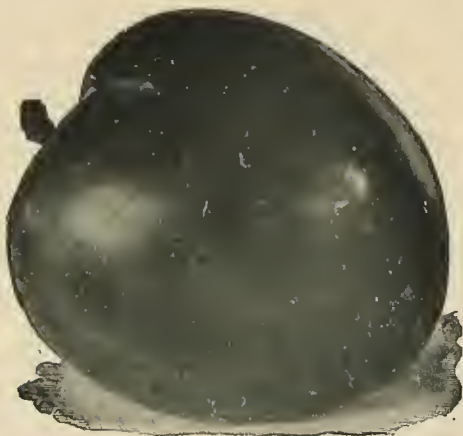

## Carman.

A Peach of North China type that promises to be of great value. The originator says it is either a seedling or a sister of Elberta. The tree has the same habit of growth, with larger and darker foliage; hardy and productive. Fruit is practically rot-proof, as the original tree, standing in low, wet ground, has perfected its fruit three seasons, while other varieties all about have rotted entirely. Carman is described as large, broad-ovate in form, pointed; skin yellowish white, dotted and flushed red; flesh creamy white, slightly tinged red, of a sprightly vinous flavor. *The Rural New Yorker* first described it some years ago as an extra large, yellow Peach, like Elberta, but five weeks earlier. It certainly is of Elberta type. *The Texas Farm and Ranch* says: "Carman Peach is large, oblong, resembling Elberta, and is the best flavored early Peach we know. The skin is tough, and it is just the Peach to ship a long distance."

	Each.	Doz.	100
First-class . . . . .	\$0.20	\$2.00	\$ 8.00
Medium-class . . . . .	.15	1.50	7.00

Early Rivers.	Reeves' Favorite.	Yellow St. John.		

WICKSON.

### Plums.

The Plum, like the pear and other finer fruits, attains its greatest perfection on our heavy soil being entirely free from disease. The curculio, a small, dark brown beetle, often stings the fruit, causing it to drop off; but the following directions, faithfully observed, will secure a good crop of this splendid fruit everywhere.

As soon as the blossoms are fallen, spread two sheets under the tree, and give the tree a sudden jar by striking a smart blow with a hammer upon the stub of a limb sawed from the tree for the purpose; the insects will drop on the sheet, and can be killed. Collect all the fallen fruit and burn or feed to swine. Repeat the operation every day for two or three weeks. It should be done before sunrise.

### The Hale Plum.

This new Plum was originated by Luther Burbank, the "Wizard of Horticulture," who says of it: "In the hedgerow of seedlings this was the most vigorous most productive, handsomest, most uniform and, next to Wickson, the best flavored of any Japan Plum I have ever seen. I do not know of any fruit that will keep longer." Most vigorous of all the Japans. Fruit large, bright orange, mottled with cherry-red. Superb in quality.

HALE, RED JUNE. WICKSON. First-class, trees 40 cts. each, \$4.00 per doz.; medium, 30 cts. each, \$3 per doz.; second-class and mail size, 25 cts. each, \$2.50 per doz.

LINCOLN, GRAND DUKE, MILTON. First-class, 30 cts. each, \$3 per doz.; medium, 25 cts. each, \$2.50 per doz.; second-class, 20 cts. each, \$2 per doz.

### Japan Plums.

	Each.	Doz.	100
Heavy first-class, 5 to 7 feet.....	\$0.30	\$3.00	\$16.00
First-class, 5 to 6 feet.....	.25	2.50	14.00
Second-class, 4 to 5 feet.....	.20	2.00	11.00
Extra, 6 to 8 feet.....	.30	3.00	20.00
Mailing size, postpaid, 6 trees for \$1.	.20	....	....

N. B.—No Plums on peach roots.

Abundance. Ogon.

Burbank. Satsuma.

Chabot. Willard.

NOTE.—Light grades of the above about 4 to 5 feet, for orchard planting, \$10 per 100.

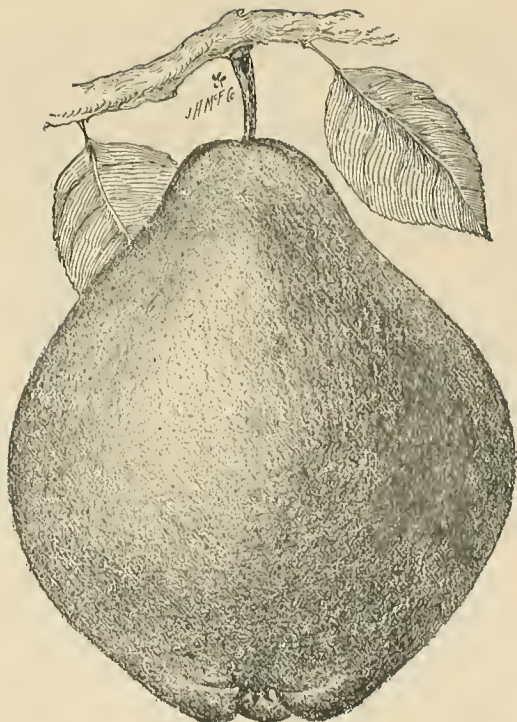

### General List of Plums.

Prices:

	Each.	Doz.	100
Heavy first-class, 5 to 7 feet.....	\$0.25	\$2.50	\$16.00
First-class, 5 to 6 feet.....	.20	2.00	14.00
Second-class, 4 to 5 feet.....	.15	1.50	12.00
Extra size, 6 to 7 feet.....	.30	3.00	18.00

NOTE.—Our Plum stock is very fine this season; our trees are all on Plum roots, and of the finest type. We have a few thousand trees, 4 to 5 feet, very nice stock of planting. These we will supply at \$10 per 100. List of trees will be given on application.

Genii.	Pond's Seedling.	Washington.
German Prune.	Prince Englebert.	Weaver.
Wolfe.	Yellow Egg.	

ROSSNEY.

## Pears.

The Pear, like most other things highly desirable and valuable, cannot be had without attention, labor and skill. The relative prices of the apple and Pear being about as one to ten show at the same time the superior value of the latter, and the greater skill required to bring it to perfection. Summer Pears should be gathered at least ten days before they are ripe, and autumn Pears at least a fortnight. Winter varieties, if they will hang so long, may be left until the leaves begin to fall.

Dwarfs must always be planted sufficiently deep to cover the junction of the Pear and Quince 2 or 3 inches, the soil made rich and well tilled, and about one-half of the previous summer's growth cut off each spring.

## **Rossney.**

A new and excellent Pear, raised from seed at Salt Lake City, Utah. In size medium to large; very fine grained, flesh melting, juicy, very sweet. Ripens two weeks after Bartlett; is an excellent keeper and shipper, with tree much stronger than Keiffer. Luther Burbank says: "The samples of Rossney Pear arrived in due season. The large size, handsome form, and creamy yellow skin with crimson blush, give the fruit a tempting appearance; and the tender, creamy flesh of just the right texture, with no hard spots and an unusually small core, with its superior flavor, make it about the best Pear so seen. If the tree is vigorous, healthy and productive, would prefer it to any other, even the Standards, Bartlett or Seckel." Specimens of this new variety were received by us from the originator last year, and we were very much impressed with its beautiful and attractive appearance, excellent quality and size; in general appearance it somewhat resembles Bartlett, but is more round. It is very seldom you can find a single variety combining so many rare qualities as this does, and we have great pleasure in offering it as the best Pear on the market at the present time. Price, first-class, \$1 each; second-class, 75 cts. each; mailing size, postpaid, 75 cts. each.

## **Koonce Pear.**

Tree is a very vigorous grower, free from blight, hardy and productive; fruit medium to large; skin yellow, with a very handsome blush; does not rot at the core, like many of the other early sorts. Ripens two weeks earlier than Harvest Belle. For fruit growers, both in the North and South, this should prove very valuable. Its vigorous growth, with heavy foliage, should enable it to endure a hot climate, while its late blooming and hardness of bud will insure for it abundant crops, despite frosts.

## **Lincoln Coreless.**

This wonderful and remarkable late winter Pear originated in Lincoln county, Tennessee, and the original tree can be tracked back for fifty years, during which time it has seldom failed to bear. The young trees are all good growers; wood dark, foliage large, healthy and entirely free from blight, leaf-rust or mildew.

## Special Varieties.

Howell, D.	Wilder Early, D.

NOTE.—Varieties followed by D. can be supplied Dwarfs as well as Standards.

Marion, Ind.

Dear Sirs:—My order No. 4885, consisting of over 700 trees at hand, and are all O. K. I never saw a nicer lot. I will have to compliment you on your boxes and packing. Thanking you very kindly,

Yours very truly,

A. L. FEIGHNER.

## Cherries.

The Cherry tree universally requires a dry soil, and is naturally a hardy tree, succeeding in the lightest soil or dryest situations. The Heart and Bigarreau varieties are of rapid growth, with large, glossy leaves, forming fine pyramidal-shaped heads, and producing large crops of luscious fruit; are well adapted for planting along streets, or in yards as shade trees.

### Dikeman.

This is a black Cherry of the Bigarreau type and ripens at a time when Sweet Cherries are very scarce, hence commands a good market price. It is unexcelled as a producer; fruit very firm, shipping and keeping so remarkably well that these qualities will make it a favorite among growers. In color, sweetness and size we know of nothing to compare with it. The original tree is said to have produced from 10 to 12 bushels of fruit last season. The fruit was on exhibition at the New York State Fair in 1897, attracting the attention and admiration of all. Price, 1-year trees, 50 cts.

### Varieties of Special Merit.

Mercer.	Murdoch's Bigarreau.	Plymouth Rock.
		Each. Doz. 100
Heavy first-class, 5 to 7 feet.....	\$0.50	\$5.00 \$35.00

Coe's Transparent.	Lutovka.	Windsor.
Dyehouse.	May Duke.	Wragg.
	Yellow Spanish.	

## Quinces.

The Quince is attracting attention as a market fruit. The tree is hardy and compact in growth, requires little space, is productive, gives regular crops, and comes early into bearing. The fruit is much sought after for canning for winter use. It flourishes in any good garden soil, which should be kept mellow and well enriched. Prune off all the dead and surplus branches, and thin out the fruit if bearing too freely. Do not neglect your Quince trees; it pays well to give them your attention.

## Bourgeat.

	Each.	Doz.	100
First-class, 2 years, 4 to 5 feet. ....	\$0.40	\$4.00	\$25.00

## Apricots.

HARRIS HARDY. Extract from *The Rural New Yorker*: "This Harris Apricot, a native seedling from central New York, is being largely grown there for commercial purposes, and is a marked success. The fruit is fully as large as the best Apricot grown in California, and so much better quality as to make and hold a place in the market against the very best from California. If people want to grow Apricots for home use or market, Harris Hardy is the one best suited to the situation." 25 c. each, \$2.50 per doz.

**Strawberries.**

**STAR.** This berry is large and handsome in appearance, measuring 6 to 7 inches in circumference, on the average. It is as near perfection as possible, somewhat resembling the Gandy, but not quite so dark in color. It is a beautiful glossy crimson, and colors all over at the same time, being an ideal berry in this respect. All the berries average large from first to last. In quality it is of the best.

In productiveness we have never seen the equal of the Star. It matures all its berries in a dry season, possessing the greatest drought-resisting qualities of any berry we are acquainted with, having mature a full crop when all the ordinary varieties were complete failures. The plant is a vigorous and strong grower, with healthy green foliage, deep-rooted and very prolific, being a staminate, or perfect variety. Season of ripening is second early.

**Nick Ohmer.**

It is healthy, vigorous, and productive. It has a perfect blossom. The fruit is of the very largest size, glossy red, firm and of excellent flavor.

Washington, D. C.

Gentlemen:—The trees came O. K. I was out yesterday to my country place and saw them while being set out, and unhesitatingly say that they were the *finest* lot of trees I ever saw. A neighbor had just received an order through an agent from a nursery at Rochester, N. Y., and he said he paid 50 cents a piece, and that mine was worth twice those of his. I am more than pleased with the whole order, and surely will recommend you, and patronize you in the future.

Very respectfully,

F. M. GIDEON.

## Raspberries.

### Cumberland.

This berry is offered with the full assurance that it is the most profitable and desirable market variety yet known, because of its immense size, firmness and great productiveness, well entitling it to its popular name of the "Business Black-cap."

In hardiness the Cumberland is all that could be desired, having undergone without injury several winters during which the temperature went as low as 20 degrees below zero. We firmly believe it to be the most productive black Raspberry yet known.

### Japanese Wineberry.

50 cts. per doz., \$1 per 100, \$7 per 1,000.

## Blackberries.

**ELDORADO.** The most valuable Blackberry ever put on the market, and is endorsed by the strongest commendations from the highest authority on fruits. It has been cultivated 12 years, and under careful test at different experiment stations for four years has never winter-killed or failed to produce a full crop of the finest fruit. The vines are very vigorous and hardy, enduring the winters of the far northwest, and their yield is enormous. Berries very large, jet-black, in large clusters, ripen well together; very sweet, melting, have no hard core, and keep 8 to 10 days after picking, with quality unimpaired.

**RATHBUN.** This is a new fruit that we offer with the utmost satisfaction. It has already established a high reputation in the vicinity where it originated, and the fruit brought a much higher price than any other Blackberry in the market at that time. The fruit is simply enormous, far larger than any other variety.

## Hardy Grapes.

### New Varieties.

**McPIKE.** This grand new variety was originated in Southern Illinois. Was awarded Wilder Silver Medal by the American Pomological Society; has taken first premium at Ohio, Illinois, Indiana and Missouri State Fairs. The present character of the Concord is shown in its seedling, "Worden," with its extra hardiness, good leaf, increased qualities of beautiful blue-black fruit and bloom upon the berry. McPike is a seedling of Worden and partakes of all good qualities of these two grapes to a marked degree. Perfectly hardy, with a leaf unprecedented; earlier than Concord; bunches large, even and compact; berries even in size; covered with a beautiful bloom, blue-black in color; ripens uniformly, and has generally the appearance of Worden. The berries are of mammoth size, bearing three inches in circumference and of superb quality—by far the best Grape grown. One berry measured  $3\frac{3}{8}$  inches. The grape is almost perfection. Mr. McPike has sent the grapes to all parts of the country, and the comments are most favorable upon its wonderful size, flavor, hardiness and beauty. 1 year, \$1; 2 year, \$1.50.

**CAMPBELL'S EARLY.** This is not a chance seedling, but the result of carefully conducted experiments by the originator, and which ended in a determined effort to procure a genuine improvement upon the Concord. The special merits claimed for this Grape are, a strong, vigorous, hardy vine; thick, mildew-resisting foliage, abundant bearer, clusters very large, shouldered, compact and handsome. Season very early. A good keeper and shipper. Berries large; black, with light purple bloom; skin thin, but very tenacious, bearing handling and shipping admirably.

**ALICE.** This is a seedling of unknown parentage. It attracted attention by its fine quality and appearance. Pronounced one of the coming Grapes. It is a pale red Grape, the size of Catawba; fruit of fine flavor, high quality, pulp meaty and tender, with few seeds, and small; skin tough, and a good shipper; therefore, a good market variety. Vine vigorous and strong, many branches growing 12 feet; foliage healthy, large, thick, dark green, free from mildew, and does not rot. Clusters medium size, compact and shouldered; ripens with Concord.

NOTE.—1000 rates and mixed lot prices furnished on application.

Six or more grape vines of a variety at dozen rates, by mail, post paid; fifty more of a kind at one hundred rate; one hundred grape vines of different kinds, if order amounts to \$5 or over, at one hundred rate; \$10 worth of grape vines at one hundred rate. Box and packing free.

NOTE—We have an immense stock of leading varieties. Write us before you buy.

## Dwarf Rocky Mountain Cherry.

This is an introduction from the west which originally grew wild in the mountains, but has been much improved by cultivation. It is remarkably hardy, a sure annual bearer and productive, of very easy culture, bearing when two years old. Fruit of good size, good flavor; is also excellent for canning, and is more easily pitted than any other Cherry. Very desirable for the kitchen garden. Price, 1 year, 10 cts. each, \$1 per doz., \$6 per 100; 2 years, 15 cts. each, \$1.50 per doz., \$10 per 100.

## Strawberry-Raspberry.

One of the remarkable recent introductions from Japan. A beautiful dwarf Raspberry, seeming from its characteristics to be a hybrid between the raspberry and strawberry. Bush dies to the ground in the fall; makes a handsome, low spreading plant, with dark green foliage. Fruit is early, stands well out from the foliage, size and shape of a strawberry; color, brilliant crimson; flavor unique. 10 cts. each, 25 cts. per doz., \$1 per 100.

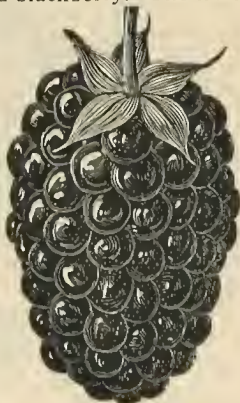

## Buffalo Berry.

This fruit resembles a small currant, but is of richer taste, and literally covers the twigs and branches. Esteemed for pies, tarts, preserves, jellies, etc. 10 cts. each, \$1 per doz., \$5 per 100.

## The Logan Berry.

This berry is unlike any in previous existence—a hybrid between the raspberry and blackberry. The fruit is as large as the largest blackberry, and is produced in immense clusters. The color is a clear dark red, pleasing to the eye. It partakes of the flavor of both the blackberry and the raspberry—a mild, pleasant, vinous flavor, delicious and peculiar to this berry alone. Excellent for all purposes. Seeds small, soft and few. Berries very firm, and carry well. Vine or cane strong grower, 10 feet and more in a season; enormous bearer. Fruit ripens early, just after strawberries, nearly all being gone before blackberries or raspberries become plentiful. Always sells at a high price. Color resembles the Cuthbert raspberry. 20 cts. each, \$2 per doz.

LOGAN BERRY,

## Japanese Golden Mayberry.

A Raspberry which ripens its fruit before Strawberries. This is a decided and valuable novelty, originated by the celebrated Luther Burdank, of California. We give the description of this wonderful berry as follows: "The earliest Raspberry ever known. The berries are of a golden straw color, as large as Cuthbert, and ripen here in April, a month before Hansell, before Strawberries, and before the earliest standard Raspberries of the past have hardly awakened from their winter rest. The bushes are distinct from all others, growing like trees, six to eight feet high, with spreading tops, and all along the branches large white, bell-shaped blossoms are pendent, followed by great, sweet, glossy, golden, semi-translucent berries. The plants, when well established, will surprise one with their abundance of fruit." Price, 75c. doz.; \$5 per 100.

## Improved Dwarf Juneberry.

A good substitute for the large or swamp huckleberry or wortleberry, which it resembles in appearance and quality.

The fruit is borne in clusters, and is reddish purple in color, changing to a bluish black. In flavor it is a mild, rich sub-acid; excellent as a dessert fruit or canned. The bushes are extremely hardy, enduring the cold of the far north and the heat of summer without injury. 10 cts. each, 75c per doz., \$5 per 100.

## Eleagnus Longipes.

This new and valuable acquisition, a native of Japan, is one of our most promising new fruits, and we highly recommend it for more general planting. The bush begins to bear at two years old, and the fruit is very highly prized by all who have fruited it, for its peculiar piquancy, making a very delicious sauce, considered much superior to the cranberry. 10 cts. each, \$1.50 per doz.

## New Hardy Orange.

(*Citrus trifoliata*.)

It is a dwarf, of low, symmetrical growth, with beautiful trifoliate, glossy green leaves, and an abundance of large, white, sweet-scented blossoms. The fruit is small, bright orange red in color, having a peculiar flavor; of no value for eating, though it may prove useful in making a lemonade, as the fruit is as acid as a lime. 15c cts. each, \$1.50 per doz.
